and Firearms
Identification**

Join us for **Atlanta Forensics
Summer Workshop**
4-Days of Hands-On Training presented by

June 12–15, 2012

West Forsyth High School • 4155 Drew Road • Cumming, GA 30040

Whether you are struggling to incorporate forensics into your already busy biology and chemistry curriculums or are looking to start a forensics program at your school, this training will address your needs and questions. Appropriate for middle school and high school teachers.

Receive:

- Forensic Science Classroom Start Up Package—activities you can use with students this fall!
- Certificate of Completion

Instructor:

Kathy Mirakovits Nine months out of a year, Kathy Mirakovits teaches advanced biology, forensic science and advanced physics to high school students in Portage, Michigan. Kathy recently received the 2011 Distinguished Service to Physics Education Award from the Michigan Section of the American Association of Physics Teachers.

For the past seven years, Kathy Mirakovits has conducted outstanding workshops across the United States for teachers interested in learning forensic science and its application in science education. Kathy has developed forensic educational kits and materials to be used in the classroom and has co-authored the textbook, *Forensic Science: The Basics*, with Dr. Jay A. Siegel.

Kathy has received training in forensic science by attending forensic science workshops sponsored by the American Academy of Forensic Science, 4 weeks of forensic science training at the Connecticut State Crime Lab, completing the basic bloodstain analysis course for certification and is a member of the International Association of Bloodstain Pattern Analysts (IABPA).

Register Today! Space is limited. Call Ward's at 800-962-2660 and order workshop number 200-8401. Cost: \$250.00 per participant.
